

SunSeed®

Pigment preparations for seed coatings

SunSeed pigment preparations are high-quality aqueous dispersions designed to deliver maximum color strength with their high solids content. They are known for their easy dispersibility and extended shelf life, making them ideal for incorporation into various customer systems. SunSeed pigment preparations offers much higher value as compared to using powder form of pigments. SunSeed preparations streamline production processes, offering faster and more cost-efficient solutions. These preparations are especially beneficial for agrochemical, seed, and seed treatment companies seeking safe, regulatory-compliant solutions for vibrant, high-value products.

SunSeed Pigment Preparation Range

SunSeed Yellow GSS	Pigment Yellow 1
SunSeed Yellow GX	Pigment Yellow 74
SunSeed Red F2R	Pigment Red 2
SunSeed Red 2B	Pigment Red 48.2
SunSeed Red Lithol R	Pigment Red 49.1
SunSeed Red FGR	Pigment Red 112
SunSeed Pink M3RL	Pigment Red 122
SunSeed MB	Pigment Blue 15.1
SunSeed Blue MBG	Pigment Blue 15.3
SunSeed Green FSN	Pigment Green 7
SunSeed Violet FSS	Pigment Violet 23
